

CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)

FOR THE YEAR ENDED OCTOBER 31, 2013

INDEPENDENT AUDITORS' REPORT

To the Shareholders of
Revolution Resources Corp.

We have audited the accompanying consolidated financial statements of Revolution Resources Corp., which comprise the consolidated statements of financial position as at October 31, 2013 and 2012, and the consolidated statements of loss and comprehensive loss, cash flows, and changes in equity for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of Revolution Resources Corp. as at October 31, 2013 and 2012, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which describes conditions and matters that indicate the existence of a material uncertainty that may cast significant doubt about the ability of Revolution Resources Corp. to continue as a going concern.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

1. NATURE AND CONTINUANCE OF OPERATIONS

Revolution Resources Corp. (the “Company”) is an exploration company incorporated on July 14, 2009 under the laws of the Province of British Columbia, Canada. The Company is listed on the Toronto Stock Exchange (“TSX”).

The Company’s head office, principal address and registered and records office is 1500 – 409 Granville Street, Vancouver, British Columbia, Canada, V6C 1T2.

The Company is in the business of acquiring and exploring economically viable mineral resource deposits on its mineral properties. The recoverability of the amounts shown for mineral properties acquisition costs and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to sustain operations in the long-term. While the Company has been successful in obtaining its required funding in the past, there is no assurance that such future financing will be available or be available on favourable terms. An inability to raise additional financing may impact the future assessment of the Company as a going concern. These material uncertainties may cast significant doubt about the ability of the Company to continue as a going concern.

The consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company’s ability to receive financial support, necessary financings, or generate profitable operations in the future.

2. BASIS OF PREPARATION

Statement of Compliance

These consolidated financial statements, including comparatives, have been prepared using accounting policies consistent with IFRS as issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

Basis of Presentation

The consolidated financial statements have been prepared on a historical cost basis except for certain financial assets measured at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

2. BASIS OF PREPARATION (cont'd...)

Use of Estimates

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of expenses during the period. Actual results could differ from these estimates.

These consolidated financial statements include estimates and judgments which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The most significant estimates and assumptions relate to the valuation of deferred income tax amounts, impairment testing, the valuation of certain financial liabilities, the valuation of the acquisition of Minera Golondrina S. de R.L. de C.V. ("Minera Golondrina"), the valuation of the derivative liability, and the calculation of share-based payments. Share-based payments, as measured with respect to stock options granted, are estimated by reference to the Black-Scholes Pricing Model; a detailed disclosure of management's estimates with respect to the pricing model is found in Note 8. The Company has reviewed its exploration and evaluation assets for indications of impairment and determined that there is no such indication in excess of what has been recorded. The value of deferred tax assets is evaluated based on the probability of realization; the Company has assessed that it is improbable that such assets will be realized and has accordingly not recognized a value for deferred taxes. The valuation of the net assets acquired upon the acquisition of Minera Golondrina is detailed in Note 4. The valuation of the derivative liability is discussed in Note 7.

The most significant judgments relate to the recoverability of capitalized amounts, the functional currency of the Company and its subsidiaries, recognition of deferred tax assets and liabilities and the determination of the economic viability of a project.

3. SIGNIFICANT ACCOUNTING POLICIES

Basis of consolidation

These consolidated financial statements include the financial statements of the Company and the entities controlled by the Company (Note 9). Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. All significant intercompany transactions and balances have been eliminated.

Foreign exchange

The functional currency is the currency of the primary economic environment in which the entity operations and has been determined for each entity within the Company. The functional currency for all entities within the Company is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting periods, the monetary assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the statement of financial position date while non-monetary assets and liabilities are translated at historical rates. Revenues and expenses are translated at the exchange rates approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in the statement of loss and comprehensive loss.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Financial instruments

Financial assets

All financial assets are initially recorded at fair value and designated upon inception into one of the following four categories: held to maturity, available for sale, loans and receivables or at fair value through profit or loss ("FVTPL").

Financial assets classified as FVTPL are measured at fair value with unrealized gains and losses recognized through profit and loss. The Company's cash and cash equivalents and short-term investments are classified as FVTPL. Financial assets classified as loans and receivables and held to maturity assets are measured at amortized cost. The Company's receivables are classified as loans and receivables. Financial assets classified as available for sale are measured at fair value with unrealized gains and losses recognized in other comprehensive income and loss except for losses in value that are considered other than temporary which are recognized in earnings. At October 31, 2013, the Company has not classified any financial assets as available for sale.

Transaction costs associated with FVTPL financial assets are expensed as incurred.

Financial liabilities

All financial liabilities are initially recorded at fair value and designated upon inception as FVTPL or other financial liabilities. Financial liabilities classified as FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as FVTPL. Derivatives, including separated embedded derivatives are also classified as held for trading and recognized at fair value with changes in fair value recognized in earnings unless they are designated as effective hedging instruments. Fair value changes on financial liabilities classified as FVTPL are recognized in earnings. The Company has classified its derivative liability as FVTPL.

Financial liabilities classified as other financial liabilities are initially recognized at fair value less directly attributable transaction costs. After initial recognition, other financial liabilities are subsequently measured at amortized cost using the effective interest rate method. The effective interest rate method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period. The Company's accounts payable and accrued liabilities are classified as other financial liabilities.

Financial instrument disclosures

The Company provides disclosures that enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the date of the statement of financial position, and how the entity manages these risks.

The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Cash and cash equivalents

Cash is comprised of cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

Short-term investments

Short-term investments consist of highly liquid investments held as collateral on other short-term obligations included in accounts payable and accrued liabilities.

Equipment

Equipment is carried at cost, less accumulated depreciation and accumulated impairment losses. Depreciation is recognized using the declining balance method at the rate of 30% annually for computer equipment.

Exploration and evaluation assets

Costs directly related to the exploration and evaluation of mineral properties are capitalized once the legal rights to explore the mineral properties are acquired or obtained. When the technical and commercial viability of a mineral resource have been demonstrated and a development decision has been made, the capitalized costs of the related property are transferred to mining assets and depreciated using the units of production method on commencement of commercial production.

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount. Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

Impairment

At the end of each reporting period, the Company's assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in profit or loss for the period. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Provisions

a) Environmental rehabilitation provisions

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations, including those associated with the reclamation of exploration and evaluation assets and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. Initially, a liability for an environmental rehabilitation obligation is recognized at its fair value in the period in which it is incurred if a reasonable estimate of cost can be made. The Company records the present value of estimated future cash flows associated with reclamation as a liability when the liability is incurred and increases the carrying value of the related assets for that amount. Subsequently, these capitalized asset retirement costs are amortized over the life of the related assets. At the end of each period, the liability is increased to reflect the passage of time (accretion expense) and changes in the estimated future cash flows underlying any initial estimates (additional rehabilitation costs). The Company recognizes its environmental liability on a site-by-site basis when it can be reliably estimated.

Environmental expenditures related to existing conditions resulting from past or current operations and from which no current or future benefit is discernible are charged to the statement of comprehensive loss. The Company had no rehabilitation obligations as at October 31, 2013 and October 31, 2012.

b) Other provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) that has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risk specific to the obligation. An amount equivalent to the discounted provision is capitalized within tangible fixed assets and is depreciated over the useful lives of the related assets. The increase in the provision due to passage of time is recognized as interest expense.

Valuation of equity units issued in private placements

The Company has adopted a residual value method with respect to the measurement of shares and warrants issued as private placement units. The residual value method first allocates value to the more easily measurable component based on fair value and then the residual value, if any, to the less easily measurable component.

The fair value of the common shares issued in the private placements was determined to be the more easily measurable component and were valued at their fair value, as determined by the closing quoted bid price on the announcement date. The balance, if any, was allocated to the attached warrants. Warrants that are issued as payment for an agency fee or other transaction costs are accounted for as share-based payments.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Share-based payments

The Company grants stock options to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value of stock options is measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to share capital.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

If and when the stock options are exercised, the applicable amounts of reserves are transferred to share capital.

Loss per share

Basic loss per share is computed by dividing loss available to common shareholders by the weighted average number of shares outstanding during the reporting period. Diluted loss per share is computed similar to basic loss per share except that the weighted average shares outstanding are increased to include additional shares for the assumed exercise of stock options and warrants, if dilutive. The number of additional shares is calculated by assuming that outstanding stock options and warrants were exercised and that the proceeds from such exercises were used to acquire common stock at the average market price during the reporting periods.

Income taxes

Deferred tax is recorded using the liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for relating to goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable loss, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the date of the statement of financial position.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it does not recognize the excess.

New standards not yet adopted

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended October 31, 2013:

- IFRS 9 New financial instruments standard that replaces IAS 39 for classification and measurement of financial assets⁽ⁱⁱⁱ⁾
- IFRS 10 New standard to establish principles for the presentation and preparation of consolidated financial statements when an entity controls multiple entities⁽ⁱ⁾

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

New standards not yet adopted (cont'd...)

- IFRS 11 New standard to account for the rights and obligations in accordance with a joint agreement⁽ⁱ⁾
- IFRS 12 New standard for the disclosure of interests in other entities not within the scope of IFRS 9/IAS 39⁽ⁱ⁾
- IFRS 13 New standard on the measurement and disclosure of fair value⁽ⁱ⁾
- IAS 28 (Amendment) New standard issued that supersedes IAS 28 (2003) to prescribe the accounting for investments in associates and joint ventures⁽ⁱ⁾
- IAS 32 (Amendment) New standard issued that supersedes IAS 28 (2003) to prescribe the accounting for investments in associates and joint ventures⁽ⁱⁱ⁾

(i) Effective for annual periods beginning on or after January 1, 2013

(ii) Effective for annual periods beginning on or after January 1, 2014

(iii) Effective for annual periods beginning on or after January 1, 2015

The Company anticipates that the application of these standards, amendments and interpretations will not have a material impact on the results and financial position of the Company.

4. ACQUISITION OF MINERA GOLONDRINA

During the year ended October 31, 2013 the Company executed a purchase and sale agreement with Lake Shore Gold Corp ("Lake Shore") a Canadian public company, which supersedes the existing option agreement (Note 6). Under the terms of the new agreement the Company acquired Lake Shore's subsidiary, Minera Golondrina, the sole material asset of which is 100% of the rights, title and interest in the Mexico Properties, subject to certain net smelter royalties ("NSR"). As consideration the Company:

- a) Issued 20,000,000 common shares, subject to certain sale restrictions;
- b) Granted Lake Shore the following royalty interests, subject in each case to certain rights to repurchase a portion of the NSR:
 - i. A 2% NSR on the Universo Property;
 - ii. A 3.5% NSR on the properties comprising the Montana de Oro Project (forming part of the Montana de Oro Property);
 - iii. A 2.5% NSR on the properties comprising the La Bufa Project (forming part of the Montana de Oro Property);
 - iv. A 2% NSR on the properties comprising the Lluvia de Oro Project (forming part of the Montana de Oro Property), and:
- c) Will pay \$5,000,000 in cash or common shares valued at the greater of \$0.20 and a five-day volume-weighted average trading price on or before December 31, 2017 (Note 7).

The acquisition was treated as an asset acquisition. The net assets of Minera Golondrina were valued with reference to the fair market value of the Company's common shares as at the time of issuance, being \$1,800,000, and the fair value of the derivative liability, which at the date of the transaction was \$2,250,000 (Note 7). It was determined that, given the inherent difficulty in providing an accurate valuation over unproven exploration and evaluation assets, the valuation of the net assets of Minera Golondrina was more reliably determined by reference to the market value of the shares issued and the future obligation. The Company incurred transaction costs associated with the acquisition of \$73,062 which have been recorded as acquisition costs.

6. EXPLORATION AND EVALUATION ASSETS

Title to mineral properties

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain mineral titles as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all its properties and, to the best of its knowledge, title to all of its properties is in good standing.

Mexico Property Portfolio

On December 14, 2011 and as amended July 26, 2012, the Company entered into an option agreement with Lake Shore to acquire up to a 100% interest in the Montana de Oro (comprised of Montana de Oro, Lluvia de Oro and La Bufa Projects) and Universo Properties in Mexico.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Under the amended agreement, in order to acquire an initial 60% in the Mexican Properties, the Company issued 5,713,740 common shares valued at \$2,056,946, must incur \$15,000,000 in expenditures on the Mexican Properties by August 31, 2016, including reimbursing Lake Shore for expenditures incurred with respect to the properties in 2011 for which the Company paid \$3,735,439, and, within 30 days of incurring \$15,000,000 in expenditures, issue to Lake Shore \$1,000,000 in common shares of the Company. Additionally, the Company will issue 7,500,000 common shares to Lake Shore over a four year period (1,000,000 issued at a value of \$195,000).

The Company could acquire a 100% interest in either or both of Montana de Oro and Universo properties by completing 43-101 compliant technical reports and satisfying certain additional terms and payments, as outlined in the Company's October 31, 2012 annual consolidated financial statements.

During the year ended October 31, 2013 the Company executed a purchase and sale agreement with Lake Shore, which supersedes the previous option agreements. Under the terms of the new agreement the Company acquired 100% of the issued and outstanding shares of Lake Shore's subsidiary, Minera Golondrina, which holds 100% of the rights, title and interest in the Mexico Properties, subject to certain net smelter royalties ("NSR") (Note 4).

The Montana de Oro properties are subject to certain underlying agreements. Underlying payments on the Montana de Oro Property total MXP 1,083,990 in the first year (paid), MXP 700,000 for the next three years and then MXP 1,083,990 every year thereafter.

During fiscal 2012, the Company entered into an option agreement to acquire three additional claims to the La Bufa claims in the Montana de Oro Property. The agreement requires cash payments totalling US\$350,000 (US\$50,000 paid) and issuing 800,000 common shares (300,000 issued at a value of \$48,000) of the Company over a two year period. The vendor retains a 1.5% NSR with respect to these claims.

During the year ended October 31, 2013 the company elected to abandon the Universo Property and a portion of the Montana de Oro Property and consequently wrote off associated capitalized costs of \$8,104,727 as at October 31, 2013.

Champion Hills Properties (USA)

During fiscal 2011, the Company acquired, from a non-arm's length private company, a 90% interest in two option and lease agreements by issuing 2,000,000 common shares valued at \$930,000 and paying \$375,312 (US\$375,000). The Company has the right of first refusal on the remaining 10% after incurring US\$1,000,000 in exploration expenditures.

The Company has entered into various additional option and purchase agreements, certain of which have been terminated, to complement the initial land package directly with property owners which entitle the Company to acquire 100% of these properties. As at October 31, 2013, the various option and purchase agreements cover approximately 704 acres (October 31, 2012 – 1,859 acres), require annual lease payments ranging from US\$50 to US\$200 per acre over a five year term and US\$1 per foot drilled. The Company has the option to purchase each land package for the greater of 150% of the appraised value or a certain fixed price. Upon commencement of commercial production the properties are subject to a 2% NSR.

During the year ended October 31, 2013 the Company elected to abandon certain non-core option agreements and consequently wrote-off the associated capitalized costs of \$761,443 as at October 31, 2013.

REVOLUTION RESOURCES CORP.

OCTOBER 31, 2013

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Champion Hills Properties (USA) (cont'd...)

Silver Hill and Silver Valley

During fiscal 2011 the Company entered into two separate letter agreements with a private company, Carolina Mineral Resources Inc. ("CMRI"), on properties known as the Silver Hill mine and the Silver Valley Mine, North Carolina.

During the year ended October 31, 2011, the Company issued 150,000 common shares valued at \$88,500 and paid \$98,567 (US\$100,000). During the year ended October 31, 2012, the Company issued an additional 150,000 common shares valued at \$51,750, paid \$80,000 and completed the first tranche of exploration expenditures totaling US\$1,000,000.

During the year ended October 31, 2013 the Company elected to abandon the Silver Hill and Silver Valley options and wrote-off the capitalized costs of \$1,669,439 as at October 31, 2013.

Hoover Hill

During fiscal 2011 the Company entered into an option and purchase agreement on the Hoover Hill mine property, North Carolina. The Company has a four year option to purchase each land package for the greater of 150% of the appraised value or a certain fixed price. The Company paid \$295,680 (US\$300,000) on signing and issued 100,000 share purchase warrants with a fair value of \$38,775. The option can be extended for an additional year for US\$100,000. Each warrant entitles the holder to one common share at an exercise price of \$0.75 for a period of four years. The Company paid other acquisition costs of \$104,548. The property is subject to a 2% NSR, of which one-half (1%) may be purchased for US\$1,000,000.

Virgilina

During fiscal 2011 the Company entered into an option agreement on the Virgilina copper property, North Carolina. During the year ended October 31, 2011, the Company issued 100,000 common shares valued at \$59,000 and paid \$118,291 (US\$120,000). During the year ended October 31, 2012, the Company issued an additional 100,000 common shares valued at \$34,500, paid \$120,000 and completed the first tranche of exploration expenditures totalling US\$100,000. The Company elected to abandon the option and wrote-off the capitalized costs of \$441,576 as at October 31, 2012.

REVOLUTION RESOURCES CORP.

6. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Nuukfjord (Greenland)

During the year ended October 31, 2013 the Company sold its 15% interest in certain mineral licences in Greenland, which had been previously written-off, known as the Storo Gold Project, for \$250,000.

Exploration advances

As at October 31, 2013, the Company had advanced \$Nil (October 31, 2012 - \$705,294) to contractors and exploration partners to be applied against future exploration on the exploration and evaluation assets in Mexico.

7. DERIVATIVE LIABILITY

Pursuant to the acquisition of 100% of the issued and outstanding shares of Minera Golondrina (Note 4), the Company is obligated to pay \$5,000,000 in cash or common shares, at the option of the Company, on or before December 31, 2017. If the Company elects to issue common shares they will be valued at the greater of \$0.20 and a five-day volume-weighted average trading price, resulting in a maximum of 25,000,000 shares being issued.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

7. DERIVATIVE LIABILITY (cont'd...)

This floor creates a derivative liability as the Company is under no obligation to deliver cash and may issue shares with a fair value less than the \$5,000,000. The value of the derivative liability has been determined to be the value of the common shares required to settle the derivative liability.

The table below illustrates the movement of the derivative liability which is based on the share price on the applicable date.

	October 31, 2013	October 31, 2012
Opening balance	\$ -	\$ -
Fair value of derivative liability	2,250,000	-
Unrealised gain on derivative liability	<u>(1,625,000)</u>	<u>-</u>
Closing Balance	<u>\$ 625,000</u>	<u>\$ -</u>

8. SHARE CAPITAL AND RESERVES

Authorized share capital

As at October 31, 2013, the authorized share capital of the Company is an unlimited number of common shares without par value. All issued shares, consisting only of common shares are fully paid.

Private placements

During the year ended October 31, 2013, the Company completed a private placement and issued 7,965,428 units at a price of \$0.07 per unit for gross proceeds of \$557,580. Each unit is comprised of one common share and one-half of one share purchase warrant. Each whole share purchase warrant entitles the holder to acquire one common share of the Company at a price of \$0.125 for a period of 2 years.

During the year ended October 31, 2012, the Company completed a bought deal financing, including the full exercise of the over-allotment option, whereby the Company issued 16,962,500 units at a price of \$0.34 per unit for gross proceeds of \$5,767,250. Each unit is comprised of one common share and one-half of one share purchase warrant. Each whole share purchase warrant entitles the holder to acquire one common share of the Company at a price of \$0.60 for a period of 18 months following the closing of the offering. The warrants were assigned a residual value of \$848,125.

The Company paid \$403,708, issued 1,187,375 brokers' warrants valued at \$95,127 and paid other share issue costs of \$204,611. Each broker warrant entitles the holder to acquire one common share of the Company at a price of \$0.60 for a period of 18 months following the closing of the offering. The fair value of these broker warrants was estimated using the *Black-Scholes Option Pricing Model* with the following assumptions: risk-free interest rate of 1.26%; dividend yield of 0%; volatility of 100%; and an expected life of 1.5 years.

(Expressed in Canadian Dollars)
OCTOBER 31, 2013

8. SHARE CAPITAL AND RESERVES (cont'd...)

Share-based payments

The Company has a stock option plan under which it is authorized to grant options to directors, officers, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. Under the plan, the exercise price of each option equals the market price of the Company's stock, less applicable discount, as calculated on the date of grant. The options can be granted for a maximum term of 10 years and vest at the discretion of the Board of Directors.

The Company did not grant any options during the year ended October 31, 2013. During the year ended October 31, 2012 the Company granted 1,175,000 options with a weighted average fair value of \$0.30 per option for options graded and vested to directors, officers and consultants. Total share-based payments for options granted and vested recognized in the statement of loss and comprehensive loss for the year ended October 31, 2013 was \$22,616 (2012 – \$379,327) pursuant to vesting incentive options. This amount was also recorded as reserves on the statement of financial position.

The following weighted average assumptions were used for the valuation of stock options:

	2013	2012
Risk-free interest rate	-	1.29%
Expected life of options	-	3.5 years
Annualized volatility	-	100%
Dividend rate	-	0.00%
Forfeiture rate	-	0.00%

9. RELATED PARTY TRANSACTIONS

The consolidated financial statements include the financial statements of the Company and its 100% owned subsidiaries Revolution Resources (NC) Inc. (USA), Minera Revolution, S.A. de C.V. (Mexico) and Minera Golondrina, (Mexico).

During the year ended October 31, 2013, the Company paid or accrued the following amounts as compensation to key management personnel:

- a) Management fees of \$181,000 (2012 - \$380,000) to officers of the Company of which \$Nil (2012 - \$96,000) was capitalized to exploration and evaluation assets.
- b) Professional fees of \$60,000 (2012 - \$65,000) to an officer of the Company.
- c) Consulting fees of \$15,000 (2012 - \$77,500) to directors of the Company.
- d) Shareholder communications fees of \$26,182 (2012 - \$20,000) to a company controlled by a director of the Company.

Share-based payment expense for the year ended October 31, 2013 included compensation to directors and officers of \$18,393 (2012 - \$271,146) for stock options vesting during the year.

Included in accounts payable is \$48,300 (2012 - \$20,000) due to directors and officers of the Company.

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

9. RELATED PARTY TRANSACTIONS (cont'd...)

The Company operates from the premises of a group of public and private companies with common directors. Certain companies provide geological consulting and office and administrative services to the Company and various other public companies. Included in accounts payable and accrued liabilities is \$93,359 (2012 - \$66,394) due to a related private company. During the year ended October 31, 2013, the Company paid or accrued \$156,181 (2012 - \$328,494) for geological consulting, and \$106,647 (2012 - \$157,940) for office and administrative expenditures.

A private company controlled by a director of the Company provides management and professional services to public companies. During the year ended October 31, 2013, the Company paid or accrued \$39,065 (2012 - \$61,194) for investor relations services, \$51,411 (2012 - \$77,060) for accounting services and \$34,741 (2012 - \$36,746) for administration expenses.

10. SUPPLEMENTAL DISCLOSURE WITH RESPECT TO CASH FLOWS

Significant non-cash transactions for the year ended October 31, 2013, include the Company:

- a) Incurring exploration and evaluation asset expenditures of \$1,045,047 through accounts payable and accrued liabilities.
- b) Incurring exploration and evaluation asset expenditures of \$165,755 through exploration advances.

Significant non-cash transactions for the year ended October 31, 2012, include the Company:

- a) Incurring exploration and evaluation asset expenditures of \$462,227 through accounts payable and accrued liabilities.
- b) Issuing 7,263,740 common shares at a value of \$2,386,196 pursuant to the acquisition of exploration and evaluation assets.
- c) Issuing 1,187,375 brokers' warrants valued at \$95,127 as finders' fees in relation to the brokered private placement.
- d) Incurring share issuance costs of \$7,588 through accounts payable.

11. INCOME TAXES

A reconciliation of income taxes at statutory rates is as follows:

	2013	2012
Income (loss) for the year before income tax	\$ (9,631,554)	\$ (2,927,531)
Expected income tax (recovery)	\$ (2,432,000)	\$ (739,000)
Expenses not deductible for income tax purposes	1,454,000	96,000
Other	2,000	(34,000)
Changes in tax rates	(1,418,000)	5,000
Change in unrecognized deductible temporary differences	<u>2,394,000</u>	<u>672,000</u>
Total income tax (recovery)	<u>\$ -</u>	<u>\$ -</u>

REVOLUTION RESOURCES CORP.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Expressed in Canadian Dollars)
OCTOBER 31, 2013

11. INCOME TAXES (cont'd...)

Significant components of deductible and taxable differences, unused tax losses and unused credits that have not been included in the statement of financial position are as follows:

	2013	2012	Expiry Dates
Share issuance costs	\$ 848,000	\$ 1,316,000	2033 - 2036
Exploration and evaluation assets	10,747,000	3,964,000	Not applicable
Non-capital losses	8,431,000	7,414,000	2014 – 2033
Equipment	11,000	8,000	Not applicable

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial Instruments

Cash and cash equivalents are carried at fair value using a level 1 fair value measurement. The carrying value of short-term investments, receivables, and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

The derivative liability is measured at fair value using a level 2. The Company calculates the fair value of the derivative liability based on the company's share price.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial risk factors

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at October 31, 2013, the Company had a cash and cash equivalents and short-term investments balance of \$450,458 to settle current liabilities of \$1,459,028. The derivative liability recognized in order to complete the acquisition of Minera Golondrina (Note 4) may be settled at the Company's option in shares; therefore, the debt is not considered to materially increase the liquidity risk of the Company.

There can be no assurance the Company will be able to obtain required financing in the future on acceptable terms. The Company anticipated it will need additional capital in the future to finance on-going exploration of its properties, such capital to be derived from the exercise of outstanding warrants and the completion of other equity financings. The Company has limited financial resources, has no source of operating income and has no assurance that additional funding will be available to it for future exploration and development of its projects, although the Company has been successful in the past in financing its activities through the previously mentioned financing activities. The ability of the Company to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions and exploration success. In recent years, the securities markets have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in

12. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)

Financial risk factors (cont'd...)

Liquidity risk (cont'd...)

price will not occur. Any quoted market for the common shares may be subject to market trends generally, notwithstanding any potential success of the Company in creating revenue, cash flows or earnings.

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents and short-term investments. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions. Receivables consist mainly of GST receivable from the Government of Canada and IVA receivable from the Government of Mexico. The Company has been successful in recovering input tax credits and believes credit risk with respect to receivables to be insignificant.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial assets exposed to interest rate risk consist of cash and equivalents and short-term investments balances. The Company's current policy will be to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As at October 31, 2013, the Company did not have any investments in investment-grade short-term deposit certificates.

b) Foreign currency risk

The majority of the Company's business is conducted in Mexico in the Canadian dollar, US dollar and Mexican pesos and in the USA in the US dollar. As such, the Company is exposed to foreign currency risk in fluctuations among the Canadian dollar, the Mexican peso and the US dollar. Fluctuations in the exchange rate among the Canadian dollar, the Mexican peso and the US dollar may have a material adverse effect on the Company's business and financial condition. Fluctuations do not have a significant impact on operating results.

c) Price risk

The mining industry is heavily dependent upon the market price of the metals or minerals being mined. There is no assurance that, even if commercial quantities of mineral resources are discovered, a profitable market will exist for their sale. There can be no assurance that mineral prices will be such that the Company's properties can be mined at a profit. Factors beyond control of the Company may affect the marketability of any minerals discovered. The price of gold has experienced volatile and significant price movements over short periods of time, and is affected by numerous factors beyond the Company's control. The Company closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

(Expressed in Canadian Dollars)
OCTOBER 31, 2013

13. CAPITAL MANAGEMENT

The Company considers capital to be the elements of shareholders' equity. The Company's primary objectives in capital management are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain sufficient funds to finance the exploration and development of its mineral property interests. The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital and is not subject to externally imposed capital requirements.

14. SEGMENTED INFORMATION

The Company's one reportable operating segment is the acquisition and exploration of mineral property concessions. Geographic information is as follows:

	October 31, 2013	October 31, 2012
Capital assets:		
Canada	\$ 7,062	\$ 10,087
