

**FORM 51-102F1
MANAGEMENT DISCUSSION AND ANALYSIS
FOR THE YEAR ENDED OCTOBER 31, 2015**

INTRODUCTION

This Management's discussion and analysis ("MD&A") reviews the significant activities of IDM Mining Ltd. ("IDM" or the "Company") and its subsidiaries and compares the financial results for the year ended October 31, 2015 (the "fiscal year 2015") and the comparable period in 2014 (the "fiscal year 2014"). This MD&A should be read in conjunction with the audited consolidated financial statements and accompanying notes for the years ended October 31, 2015 and 2014, which are available on the SEDAR website at www.sedar.com.

All financial information in this document is prepared in accordance with International Financial Reporting Standards ("IFRS") and presented in Canadian dollars unless otherwise indicated.

The effective date of this MD&A is February 12, 2016.

Some of the statements in this MD&A are forward-looking statements that are subject to risk factors set out in the cautionary note contained herein.

Additional information related to the Company is available for view on SEDAR at www.sedar.com and on the Company's website at www.idmmining.com.

DESCRIPTION OF BUSINESS

IDM is based in Vancouver and was incorporated on July 14, 2009 pursuant to the *Business Corporations Act* (British Columbia) and commenced business at that time. The Company's shares were voluntarily delisted from the Toronto Stock Exchange (the "TSX") after close of trading on December 29, 2015 and were listed on TSX Venture Exchange (the "TSXV") on open of trading on December 30, 2015 under the symbol "IDM". On June 6, 2014, the Company changed its name from "Revolution Resources Corp." to "IDM Mining Ltd." and consolidated its issued and outstanding shares on the basis of 6 pre-consolidated shares for one post-consolidated share. All share and per share amounts in this MD&A have been adjusted to reflect the share consolidation.

The Company is an exploration stage company in the business of acquiring, exploring and developing natural resource properties in British Columbia and Yukon. The Company's primary focus is on the the high-grade Red Mountain gold project located near Stewart, B.C, which recently entered the BC and Canadian environmental assessment process..

HIGHLIGHTS AND SIGNIFICANT EVENTS

The following is a summary of highlights and significant events that occurred during fiscal year 2015 and up to the date of this MD&A:

- In November 2014, the Company announced results for step-out holes at the 141 Zone completed as part of the initial surface drilling campaign. The objective of the drilling at the 141 Zone was to target high-grade underground mineralization similar to the resource area and confirm the presence of wide intervals of lower-grade porphyry-style gold mineralization, similar to other large gold deposits in north western BC. Drill hole MC14-03 accomplished both tasks, intersecting 138 meters of 1.41 g/t Au including; 7.5 meters of 10.45g/t Au. Drilling was also completed at the Cambria Zone, Marc Extension Zone and AV Zone.
- In January 2015, the Company announced that it received results from sampling of un-assayed historic drill core from the 141 Zone at the Red Mountain Gold Project. The objective of the historic drill programs at the time was to target high-grade gold, resulting in many areas of strong alteration and sulphide mineralization remaining un-sampled. The mineralized trend of the 141 Zone is subparallel to the mineralized zones of the resource area including: the Marc/AV/JW Zones, spanning a broad area at least 325 meters long by 350 meters wide and is open for expansion in all directions.
- In January 2015, the Company announced that director Aaron Keay had resigned.
- In April 2015, the Company announced that it extinguished \$676,845 of amounts owing to certain creditors through the issuance of 4,512,301 common shares of the Company at a deemed price of \$0.15 per share.
- In May 2015 the Company announced the appointment of Harry Pokrandt and Glen Masterman to an Advisory Board of the Company;
- In June 2015, Mr. Robert McLeod, Mr. Michael McPhie, Mr. David Parker and Mr. Andrew Farncomb were re-elected as directors at the Company's annual general meeting.

- In June 2015, the Company announced it had amended the terms Purchase and Sale Agreement to settle the Company's remaining payment obligation of \$5.0 million to Lake Shore Gold Corp. Pursuant to the terms of the amended agreement and in full settlement of the payment obligation, the Company issued 7,500,000 common shares and 20,000,000 common share warrants. Each warrant entitles Lake Shore to acquire one common share at a price of \$0.20 for a period of 60 months following the issuance of the warrants. The warrants are subject to an acceleration provision if the Company's shares trade at or above \$0.40 per share for 20 consecutive trading days.
- In July 2015, the Company closed two tranches of a non-brokered private placement for gross proceeds of \$1,359,703 consisting of 4,295,200 flow-through units at \$0.14 per flow-through unit and 7,583,750 common units at \$0.10 per common unit. Each flow-through unit consisted of one common share and one half-warrant, with each whole warrant exercisable for a period of 24 months at \$0.18 per share. Each common unit consisted of one common share and one half-warrant exercisable for a period of 24 months at \$0.15 per share. Finder's fees payable in connection with the financing consisted of a total of \$13,300 and 130,200 finder's warrants.
- In August 2015, the Company closed the final tranche of the non-brokered private for gross proceeds of \$671,078 of consisting of 3,007,700 flow-through units at \$0.14 per flow-through unit and 2,500,000 common units at \$0.10 per common unit. Each flow-through unit consisted of one common share and one half-warrant, with each whole warrant exercisable for a period of 24 months at \$0.18 per share. Each common unit consisted of one common share and one half-warrant exercisable for a period of 24 months at \$0.15 per share. No finder's fees were paid in connection with the final tranche of the private placement.
- In August 2015, the Company submitted a Project Description to BC EAO and the Canadian Environmental Assessment Agency (the "Agency"). In November 2015, BC EAO and the Agency initiated the environmental assessment (EA) of the Red Mountain Underground Gold Project (the "Project") under Section 10(1)(c) of the British Columbia *Environmental Assessment Act*.
- In December 2015, the Company completed a private placement with Oban Mining Corporation ("Oban") for gross proceeds of \$1.0 million consisting of 11,111,111 common shares at a price of \$0.09 and makes the second and final pre-production option payment of \$1.0 million to Seabridge Gold.
- In December 2015, the Company completed a non-brokered private placement for gross proceeds of \$1,581,488 consisting of 9,989,800 flow-through units at \$0.11 per flow-through unit and 5,362,333 common units at \$0.09 per common unit. Each common and flow-through unit consisted of one common share and one-half warrant, with each whole warrant exercisable for a period of 24 months at \$0.14 per share. Finder's fees payable in connection with the financing consisted of \$48,485 and 552,939 finder's warrants.
- In January 2016, Mr Gernot Wober, Oban's nominee, was appointed a director.
- In February 2016, the Company closed the remainder of the transaction with Oban and acquires Oban's portfolio of properties located in Yukon. As consideration, the Company issued 7,188,889 common shares and granted a 1% net smelter royalty over the Yukon properties and certain other rights. The Yukon properties consist of approximately 14,500 claims covering 11 project areas consisting of 52 claim groups totaling over 300,000 hectares.

Additional information, including the full news release, can be found on www.sedar.com and the Company's website www.idmmining.com

RESERVES AND RESOURCES

National Instrument 43-101 ("43-101") of the Canadian Securities Administrators – Standards of Disclosure for Mineral Projects – requires that each category of mineral reserves and mineral resources be reported separately. Readers should refer to IDM's continuous disclosure documents available at www.sedar.com for this detailed information, which is subject to the qualifications and notes therein set forth.

PROPERTIES

Red Mountain, British Columbia

IDM has an option to earn a 100% interest in the 17,125 hectare Red Mountain Project. It is located in northwestern B.C., 15 kilometers ("km") northeast of the town of Stewart. Discovered in 1989, the property was explored extensively until 1996 by Lac Minerals Ltd. and Royal Oak Mines Inc., with 466 diamond drill holes and over 2,000 meters ("m") of underground development completed, along with extensive engineering and environmental baseline work. Additional studies were completed over the past 12 years by Seabridge Gold Inc., North American Metals Corp. and Banks Island Gold Ltd.

In April 2014, IDM entered into an option agreement with Seabridge Gold Inc ("Seabridge") granting IDM the right to acquire a 100% interest in the Red Mountain Project, subject to certain underlying royalties and gold streams. To acquire 100%, IDM issued 4,955,000 shares, paid \$2.0 million and incur \$7.5 million in exploration and development expenditures over 3 years (\$2.5 million per year commencing June 2014- \$4.3 million incurred to date).

IDM has the right to extend the deadline of the final \$2.5 million of exploration and development expenditures by one year upon payment of \$250,000 to Seabridge. Upon the commencement of commercial production, the Company will make an additional one-time payment of \$1.5 million to Seabridge. Seabridge will also retain a gold metal stream on the Red Mountain Project, allowing Seabridge to acquire 10% of the annual gold production from the property at a cost of US\$1,000 per ounce up to a maximum of 500,000 ounces produced (50,000 to Seabridge). Alternatively, Seabridge may elect to receive a one-time cash payment of \$4.0 million at the commencement of production in exchange for the buy-back of the gold metal stream.

An Independent Technical Report was prepared by JDS Energy & Mining Incorporated and TS Technical Services Ltd., following the guidelines of the Canadian Securities Administrators National Instrument 43-101 and Form 43-101F1 report, titled "Preliminary Economic Assessment Technical Report, Red Mountain Gold Project, Northwestern, BC, Canada" ("PEA"). The report was filed on SEDAR on September 3, 2014 and can be viewed on the SEDAR website, www.sedar.com, and IDM's website www.idmmining.com. This report, which includes a revised resource estimate, was authored by Dunham Craig, P.Geo., Scot Klingmann, P.Eng., Gord Doerksen, P.Eng., and Tom Shouldice, P.Eng. who are independent Qualified Persons as defined under National Instrument 43-101.

The PEA is preliminary in nature; it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and that there is no certainty that the PEA will be realized.

Red Mountain Preliminary Economic Assessment Results

A summary of the PEA results based on a 5% Discount Rate, 0.95 CAD:USD, US\$1,250 per ounce gold price and US\$20 per ounce silver price is as follows. Full details are available in the NI 43-101 Technical Report.

Key Aspects and Assumptions of the PEA Study:

Summary of Results		
Mine Life	Years	5.0
Resource Mined	M tonnes	1.4
Waste Mined	M tonnes	0.0
Total Mined	M tonnes	1.4

2014 Resource Estimate

Numerous resource estimates were completed from 1989 to present. During 2000, North American Metal Corp (“NAMC”) conducted a detailed review of all data, relogged all core within a 20 m envelope of the mineralized material within the Marc, AV and JW zones and reviewed all exploration holes for potential inclusion into the resource. An extensive quality control and quality assurance (“QA/QC”) review was completed on all exploration work and a comparative analysis was performed on drill hole data, underground bulk sampling and geology. The 2000 NAMC resource was reviewed, cross checked and verified for accuracy in May 2014 and is the basis for IDM Mining’s revised resource estimate below.

Mineral Resource Statement for the Red Mountain Gold Project at a 3 grams per tonne (“g/t”) Cut-off Grade*

Zone	Tonnage	In situ Gold Grade	In situ Silver Grade	In situ Contained Gold	In situ Contained Silver
	(tonnes)	g/t	g/t	(Troy ounces)	(Troy ounces)
Marc Zone					
Measured	651,600	9.26	40.06	194,000	839,215
Indicated	10,800	9.71	30.33	3,400	10,477
Inferred	0	0.00	0.00	0	0
AV Zone					
Measured	508,200	7.14	20.88	116,700	341,202
Indicated	283,800	7.32	21.03	66,800	191,935
Inferred	1,800	10.96	39.50	600	2,308
JW Zone					
Measured					
Indicated					
Inferred	331,100	7.67	12.57	81,600	133,900
Total Measured & Indicated	1,454,300	8.15	29.57	380,900	1,382,800
Total Inferred	332,900	7.69	12.72	82,300	136,200

*3 g/t Au is calculated as the cut-off grade for underground long hole stoping.

This resource estimate utilizes a more robust and conservative geologic model as compared with the previous 2013 NI 43-101 resource estimate for Red Mountain, prepared by Banks Island. Additionally, due to sparse drill density, Inferred Resources from the 141 Zone are not included in the current IDM resource estimate.

The current mineral resource estimate, effective date July 23, 2014, was prepared under the supervision of Dunham Craig, P.Geo. using 3D GEMS block modeling software. Resources were estimated from 206 surface and underground drill holes in 4 by 4 by 4 m blocks by ordinary kriging and anisotropic search ellipsoids designed to fit the geology. Grade estimates were based on capped 1.5 m composited assay data. Gold values used in the interpolation runs were top cut to 44 g/t Au, and silver top cut to 220 g/t Ag.

Fiscal Year 2015 Activities:

The Company continued to advance the permitting of the Red Mountain Gold Project and in August 2015, submitted a Project Description to BC EAO and the Agency. In November 2015, BC EAO and the Agency initiated the environmental assessment (EA) of the Red Mountain Underground Gold Project (the “Project”) under Section 10(1)(c) of the British Columbia *Environmental Assessment Act*.

Since the agreement to acquire the Red Mountain property was announced in April 2014, the Company continues to advance the project development through the EA process by completing the necessary environmental baseline

work, project engineering, as well as First Nation and stakeholder engagement. The following work was completed in fiscal year 2105:

- Further environmental baseline work, including: surface and groundwater sampling and analysis, geo-hazard assessment, wildlife and fisheries studies and archaeological assessments;
- Socioeconomic studies, First Nation and community engagement;

No field exploration work was completed in the 2015 field season.

Fiscal Year 2014 - Surface Exploration Work

Surface mapping, along with rock and soil sampling were completed in 2014. This work targeted known showings, as well as reconnaissance work in new areas.

The McAdam zone is located 3,000 m southwest, and 800 m lower in elevation from the Marc and AV zone resource area. This undrilled prospect hosts multiple en echelon shears and quartz-pyrite-molybdenite veins, ranging from 0.2 to 1.5 m in thickness. Located in steep terrain requiring rope-assisted sampling, 102 chip samples were previously collected by Lac Minerals in 1991. A total of 31 of these historic samples assayed over 1.0 g/t Au, averaging 18.7 g/t Au and 56.1 g/t Ag. Individual channel samples included: 0.2 m averaging 103.8 g/t Au, 1.0 meter averaging 24.7 g/t Au and 0.6 m averaging 57.1 g/t Au. Confirmation sampling by IDM crews of quartz-pyrite-molybdenite veins at McAdam returned assay values ranging from 1.5 g/t Au to 36.7g/t Au. The average of all 42 rock samples collected in the McAdam area is 2.8 g/t Au. The McAdam zone was identified as top priority drill target for IDM's fall 2014 drill campaign.

A further 700 m southwest of the McAdam zone, in an area of glacial retreat that has uncovered newly exposed areas of outcrop; reconnaissance prospecting discovered additional new areas of gold mineralization which has been collectively named the Lost Valley prospect. Two grab samples of pyrite +/- quartz stockwork returned 10.5 g/t Au and 2.2 g/t Au, respectively, 50 meters apart. Twelve other reconnaissance grab samples returned low to anomalous precious metal values.

Recent glacial retreat has exposed a large area of previously unexplored outcrop and rubble, south of the McAdam prospect. New exposure of a quartz monzonite stock (Erin stock) has revealed extensive molybdenite mineralization within quartz vein stockwork. This intrusive measures about one square kilometer in area. Of the 106 grab, subcrop and channel samples collected in the Erin stock area, all samples averaged 0.110% Mo. Individual grab samples of molybdenum rich stockwork, with veins typically 0.5 to 10 centimeters wide, included grades of 1.39%, 1.65 and 1.81% Mo. Stockwork and mineralization is typically strongest within a 25 to 50 meter wide area proximal to the quartz monzonite contact with surrounding hornfels, but molybdenite is common throughout the intrusive.

During the 2014 surface exploration program, a total of twelve diamond drill holes were completed at Red Mountain primarily focused on exploration targets outside of the current resource area. Highest priority targets included: the 141 Zone, Cambria & Uxlux Zones and McAdam Zone. The objective of the drilling at the 141 Zone was to target high-grade underground mineralization similar to the resource area and confirm the presence of wide intervals of lower-grade porphyry-style gold mineralization, similar to other large gold deposits in north western BC. Drill hole MC14-03 accomplished both tasks, intersecting 138 m of 1.41g/t Au including; 7.5 meters of 10.45g/t Au. This hole was completed at 202 meters depth and ended in mineralization. Drill hole MC14-02 was completed at a shallower angle from the same pad, and intersected 84 meters averaging 0.80 g/t Au. Drill hole MC14-01, collared 65 meters west of holes MC14-02 and MC14-03, intersected 60.00 meters averaging 1.16 g/t Au.

Step-out drill hole MC14-005 intersected 9.35 meters true width averaging 6.59 g/t Au, including a 1.70 meter interval of 20.0 g/t Au. This is located approximately 15 meters updip from the JW Zone, the third of a series of en-echelon zones comprise the Resource Area at Red Mountain.

Two new zones were discovered through drilling during the 2014 season. Located near the underground decline, the Marc Zone Extension is a historic prospect with high-grade gold from surface trenching. Previous operators

placed development rock from underground development over top of this prospect; drilling by IDM at the edge of the waste rock pad collared into gold mineralization, with MCEX14-01 intersecting 5.50 meters averaging 6.16 g/t Au including 2.0 meters averaging 12.92 g/t Au. A second, steeper hole from the same drill pad MCEX14-02 intersected 4.90 meters averaging 1.69 g/t Au. These two intercepts suggest a potential northerly dip to the mineralized zone. Due to the Marc Zone Extensions' close proximity to existing works, this is a priority follow-up area for future drilling.

Five drill holes were completed in the Cambria zone. Significant new areas of massive and semi-massive sulphide were identified during the 2014 field season. These are newly exposed areas of surface mineralization that were uncovered due to glacial retreat over the past 20 years. The Cambria zone is located 500 meters southeast and on trend with the Marc-AV-JW resource area. Similar to the Marc zone, the Cambria zone hosts a large area of centimeter to several meters wide gold-bearing massive pyrite stockworks and veins. Cut-saw channel samples averaged 10.94 g/t Au over 8.13 meters and 20.31 g/t over 3.40 meters, with mineralization continuing under overburden. Located 150 meters north of Uxlox within a contiguous north-striking structure, the Wyy Lo'oop Zone is another recently exposed outcropping of massive sulphides. A 3.94 meter long channel sample of massive and semi-massive mineralization assayed 10.6 g/t Au.

Drilling tested 200 meters of strike length, encountering stockwork of massive pyrite and pyrrhotite veins. Discovery drill hole CB14-01 intersected 4.39 meters true width averaging 5.67 g/t Au including 0.93 meters true width averaging 13.50 g/t Au starting at 41.3 meters downhole. Other holes intersected strong sulphide mineralization and anomalous gold values, with the Cambria structure wide open for expansion.

In 2014, IDM conducted a sampling program of select drill holes of un-assayed core from drilling completed by Lac Minerals in 1993 and 1994. The objective of the historic drill programs was to target high-grade gold, resulting in many areas of strong alteration and sulphide mineralization remaining unassayed. A total of 68 core samples were submitted, covering un-assayed intervals ranging from 1.0 to 18.2 meters from five holes. Individual samples were typically 1.0 to 1.5 meters in length.

Assay results from the new sampling and revised intervals from the 141 Zone are as follows:

Hole-ID	From (m)	To (m)	Length (m)	Au (g/t)
M93-139	167.00	326.00	159.00	0.73
M94-184	214.80	386.00	171.20	1.05
Including	214.80	275.00	60.20	2.28
Or	234.80	248.50	13.70	6.26
M94-185*	188.20	302.70	114.50	1.38
Including	188.20	245.00	56.80	2.18
M94-186	153.00	292.00	139.00	1.59
Including	153.00	171.00	18.00	5.45
M94-203	373.50	470.50	97.00	1.63
Including	402.60	408.60	6.00	8.60

**Additional un-assayed intervals in this intersection*

The mineralized trend of the 141 Zone is subparallel with the Resource Area including the MARC/AV/JW Zones, spanning a broad area at least 325 ms long by 350 m wide and is open for expansion in all directions. Further infill and step-out drilling is required to complete an initial NI43-101 resource estimate for the 141 Zone.

About Red Mountain

Red Mountain is a 14 km² hydrothermal system, within the Stikine terrain. Gold mineralization is associated with and partially hosted within an early to mid-Jurassic multi-phase intrusive complex, with associated volcanic and volcanoclastic rocks and sediments. Many gold mineralized zones occur on the Property, including three mineralized zones with established resource estimates. These mineralized zones have been folded, and are separated by dip-slip fault zones: the Marc, AV and JW zones. They are moderate to steeply dipping, roughly tabular and vary in widths from one to 40 m, averaging about 15 m in thickness. Gold and silver tellurides, and free milling mineralization is associated with stockworks, dissemination and patches of coarse grained pyrite. Alteration facies includes strong quartz-sericite alteration.

Throughout the Property, multiple high-grade areas have been identified through surface sampling and local drilling by previous explorers. Of particular significance, since the vast majority of exploration work was completed on the property during 1996 and prior, glacial retreat has been surrounding known mineralized areas has been very extensive, with up to a kilometer at the south end of the Property. Glacial retreat over the past couple of decades has resulted in discoveries of additional mineralized zones at Seabridge's KSM Project and Pretivm's Valley of the Kings Deposit.

Yukon Properties

In February 2016, the Company acquired Oban's portfolio of Yukon Properties. As consideration, the Company issued 7,188,889 shares and granted a 1% net smelter royalty over the properties and certain other rights to Oban.

The Yukon portfolio consists of approximately 14,500 claims covering over 11 project areas consisting of 52 claim groups totaling over 300,000 hectares. The properties cover multiple tectonic and metallogenic environments as well as a variety of mineral deposit styles common in Yukon. Significant early stage exploration was previously completed, including 158,646 soil samples, airborne geophysical surveys, reconnaissance mapping and sampling, and over 10,000 meters of drilling on two of the projects. The properties are subject to certain underlying royalties,

QA/QC

The 2014 exploration program at Red Mountain included a rigorous Quality Control/Quality Assurance program, overseen by Rob McLeod, P.Geol, President and CEO of IDM, a Qualified Person as defined by NI 43-101. Drill cores were logged and cut in-half using a diamond saw, with one half placed in sealed bags and shipped to Acme Analytical Labs' sample preparation facility in Smithers, BC, with pulps subsequently shipped to Acme's Lab in Vancouver, BC. 10% of all samples submitted include randomly inserted blank material or multiple quality control standards. An additional 10% of samples will be shipped to a third party analytical lab.

Additional technical information on Red Mountain including the NI43-101 Technical Report can be reviewed at www.IDMmining.com and www.sedar.com.

QUALIFIED PERSON

Technical disclosure for the Company's projects included in this MD&A has been reviewed and approved by Robert McLeod, P. Geo. Mr. McLeod is IDM's CEO and President and a Qualified Person under the meaning of National Instrument 43-101 Standards of Disclosure for Mineral Projects.

Working Capital	(2,552)	(1,251)	(1,768)	(1,435)
Derivative liability	4,750	5,000	1,000	875
Shareholders' Equity/(Deficit)	(1,246)	3,493	12,829	13,098
Net Loss	(6,913)	(14,154)	(270)	(453)
Loss per Share	(0.17)	(0.68)	(0.01)	(0.02)

The variability in IDM's net loss over the last the eight quarters resulted primarily from the abandonment and write-off of certain mineral properties, changing levels in capital expenditures, share-based payments, finance charges, and office and administrative expenses. Changing levels in capital expenditures expenses and general and administrative costs fluctuate independently according to exploration activities and corporate activities including shareholder communication.

Significant financial items during previous quarters include:

During the quarter ended October 31, 2014, the Company wrote-down the carrying value of the Champion Hills properties and consequently wrote off associated capitalized costs of \$6,634,445. In addition, the Company wrote off expenditures incurred on the Mexican properties of \$172,134.

During the quarter ended July 31, 2014, the Company elected to abandon the Montana de Oro Properties and consequently wrote off associated capitalized costs of \$9,193,484. The Company also recognized an unrealized loss on the derivative liability of \$4,000,000.

During the quarter ended April 30, 2014, the Company entered into the Red Mountain acquisition option agreement. There were no other significant items during the quarter.

During the quarter ended October 31, 2013 the Company recognized an unrealized loss on the derivative liability of \$1,625,000. The Company also wrote-off an additional \$3,140,588 relating to exploration and evaluation projects the Company has abandoned, of which the majority related to Mexico.

RESULTS OF OPERATIONS

Year Ended October 31, 2015 compared to Year Ended October 31,2014

The Company's net income for the year ending October 31, 2015 was \$1,253,351 or \$0.02 per share compared to a net loss of \$21,790,436 or (\$0.79) per share for the year ended October 31, 2014.

Significant expenditures or movements include marketing advisory and investor communication \$248,624 (2014 - \$137,534) which includes \$66,667 of amortized of prepaid services in fiscal year 2015, management fees \$261,629 (2014 - \$464,000), office and miscellaneous \$121,927 (2014 - \$115,013), and professional fees \$100,981 (2014 - \$311,450). In fiscal 2015, the Company issued 4,155,000 (2014 - 3,350,000) stock options resulting in \$353,287 (2014 - \$649,619) of share based compensation being recognized.

In 2015, the Company settled the outstanding liability with Lake Shore and recognized a gain on the settlement of the derivate liability in the amount of \$2,309,648. In 2014, the Company recorded an unrealized loss on the derivate liability of \$4,125,000.

In 2014, the Company wrote down the carrying value of its Mexican and Champion Hills properties by \$16,000,063. There were no comparable write-downs in 2015.

The operating losses are a reflection of the Company's status as non-revenue producing mineral exploration company. As the Company has no main source of income, losses are expected to continue for the foreseeable future.

For the three months ending October 31, 2015

The Company's net income for the three month period ended October 31, 2015 was \$946,386 or \$0.00 per share compared to a net loss of \$6,913,404 or (\$0.17) per share for the three months ended October 31, 2014.

During the three months ended October 31, 2015 the Company recorded the gain on settlement of the derivate liability by \$1,195,588.

During the three months ended October 31, 2014, the Company wrote-down the carrying value of the Champion Hills properties and consequently wrote off associated capitalized costs of \$6,634,445. In addition, the Company wrote off expenditures incurred on the Mexican properties of \$172,134.

Investing Activities

Net cash used by the Company in investing activities on exploration and evaluation assets for the year ended October 31, 2015 was \$1,699,084 (2014 - \$3,791,883, including the \$1,000,000 paid under the Red Mountain Option Agreement).

Financing Activities

During the year ended October 31, 2015, the Company received proceeds of \$2,030,781 (2014 – \$5,755,922) from the issuance of shares and paid share issuance costs of \$13,300 (2014 - \$474,543).

The Company issued 4,512,301 shares with a fair value of \$676,845 in settlement of debt relating to services provided on the Red Mountain project. In addition, the Company issued 7,500,000 shares and 20,000,000 warrants valued at \$2,440,352 in full settlement of the remaining payment obligation to Lake Shore Gold Corp of \$5,000,000.

Off-Balance Sheet Arrangements

The Company does not have any off balance sheet arrangements.

Related Party Transactions

These condensed consolidated financial statements include the financial statements of the Company and its 100% owned subsidiaries Storgold Resources Ltd (Canada – Inactive), Revolution Resources (NC) Inc. (USA), Minera Revolution, S.A. de C.V. (Mexico) and Minera Golondrina, S. de R.L. de C.V (Mexico).

During the year ended October 31, 2015, the Company paid or accrued the following amounts as compensation to key management personnel:

- a) Management fees of \$138,000 (2014 - \$209,000) to Robert McLeod, CEO and a director of the Company of which \$Nil (2014 - \$Nil) was capitalized to exploration and evaluation assets.
- b) Management fees of \$45,000 (2014 - \$150,000) to Falkirk Global Management, a company controlled by Michael McPhie, an executive director of the Company.
- c) Management fees of \$60,000 (2014 - \$11,250) to Susan Neale, an officer of the Company
- d) Management fees of \$Nil (2014 - \$78,750) to Red Fern Consulting Ltd, a company controlled by Jonathan Richards, a former officer of the Company.
- e) Management fees of \$Nil (2014 - \$15,000) to Aaron Keay, former CEO and director of the Company.
- f) Director fees of \$23,000 (2014 - \$27,000) to non-executive directors.
- g) Professional fees of \$ Nil (2014 - \$25,000) to Highland Capital Inc, a company controlled by Andrew Farncomb, a director of the Company.
- h) Share-based compensation for the year ended October 31, 2015 included compensation to directors and officer of \$291,824 (2014 - \$567,656) for stock options vesting during the year.

Included in accounts payable is \$24,435 (October 31, 2014 - \$105,126) due to directors, officers and companies controlled by directors and officers of the Company.

The Company operates from the premises of a group of public and private companies with a common director. Certain companies provide geological consulting and office and administrative services to the Company and various other public companies. Included in accounts payable and accrued liabilities is \$140,177 (October 31, 2014 - \$174,326) due to McLeod Williams Capital Corp, a related private company. During the year ended October 31, 2015, the Company paid or accrued 72,544 (2014 - \$102,449) for office and administrative expenditures and \$Nil (2014 - \$104,980) for geological consulting.

A private company controlled by Aaron Keay, a former director of the Company provides management and professional services to public companies. During the year ended October 31, 2015, the Company paid or accrued \$Nil (2014 - \$25,000) for accounting services.

A private company controlled by Michael McPhie, that specializes in government affairs, project permitting and environmental assessment and baseline studies provides these services to public and private companies. During the year ended October 31, 2015, the Company paid or accrued \$90,780 (2014 - \$Nil) for these services relating to the environmental baseline studies and permitting of the Red Mountain property.

Subsequent Events

- a) In December 2015, the Company completed a non-brokered private for gross proceeds of \$1,581,488, consisting of 9,989,800 flow-through units at \$0.11 per flow-through unit and 5,362,333 common units at \$0.09 per common unit. Each flow-through unit consisted of one common share and one half-warrant, with each whole warrant exercisable for a period of 24 months at \$0.14 per share. Each common unit consisted of one common share and one half-warrant exercisable for a period of 24 months at \$0.14 per share. Finder's fees payable in connection with the financing consisted of a total of \$48,485 and 552,939 finder's warrants.
- b) In December 2015, the Company completed a private placement with Oban Mining Corporation ("Oban") for gross proceeds of \$1,000,000, consisting of 11,111,111 common shares at a price of \$0.09. Finder's fees payable in connection with the financing consisted of \$50,000 and 555,555 finder's warrants.
- c) In December 2015, the Company made the second option payment of \$1,000,000 pursuant to the option agreement with Seabridge Gold towards earning a 100% interest in the Red Mountain Gold Project.
- d) In February 2016, the Company acquired from Oban its portfolio of properties located in Yukon. As consideration, the Company issued 7,188,889 common shares and granted a 1% net smelter royalty over the Yukon properties and certain other rights. Pursuant to the agreement, Oban has been granted the following rights for as long as Oban holds at least 10% of the issued shares of the Company, on a non-diluted basis: Oban will (i) be entitled to nominate one director to be put forward on the management slate of directors at any meeting of the Company's shareholders, (ii) have the right to participate in future equity financings by the Company on a pro-rata basis, and (iii) have a 30 day right of first refusal over any sale of a royalty, royalty buy-back, stream, forward, off-take, gold loan or other agreement involving the sale of a similar interest in products that the Company proposes to enter into from time to time, subject to certain exceptions. A Finder's fee in connection with the acquisition of the Yukon properties consisted of a total of \$32,350 and 359,444 finder's warrants.

The Yukon properties consists of approximately 14,500 claims covering 11 project areas consisting of 52 claim groups totaling over 300,000 hectares.

LIQUIDITY AND CAPITAL RESOURCES

The Company has no operations that generate cash flow. The Company's future financial success will depend on the discovery of one or more economic mineral deposits. This process can take many years, can consume significant resources and is largely based on factors that are beyond the control of the Company and its management. To date, the Company has financed its activities by the private placement of equity securities, consisting of a combination of flow-through and non-flow-through securities. In order to continue funding their exploration activities and corporate costs, exploration companies are usually reliant on their ongoing ability to raise financing through the sale of equity. This is dependent on positive investor sentiment, which in turn is influenced by a positive climate for the commodities that are being explored for, a company's track record, and the experience and caliber of a company's management. There is no assurance that equity funding will be accessible to the Company at the times and in the amounts required to fund the Company's activities.

Cash and Financial Condition

As at October 31, 2015, the Company had a working capital deficiency of approximately \$1.5 million. Included in the working capital deficiency is the \$1.7 million relating to amounts owing in Mexico. Of this, \$1.3 million relates to Mexican mining property taxes (holding costs) required to keep the properties in good standing. The Company has abandoned all properties in Mexico, is in the process of winding up operations in Mexico and is working with certain vendors to settle outstanding payables with respect to the Mexican operations. In December 2015, the Company closed two non-brokered private placements and raised a further \$2.6 million. Going forward, additional funds will be needed to finance the development of the Company's principal asset and to provide working capital to cover administrative expenses.

The Company has no other debt does not have any unused lines of credit or other arrangements in place to borrow funds, and has no off-balance sheet arrangements.

The Company manages its liquidity risk (i.e., the risk that it will not be able to meet its obligations as they become due) by forecasting cash flows from operations together with its investing and financing activities. Expenditures are adjusted to ensure liabilities can be funded as they become due. Management and the Board of Directors are actively involved in the review, planning, and approval of significant expenditures and commitments.

Financial Instruments

Cash and cash equivalents are carried at fair value using a level 1 fair value measurement. The carrying value of short-term investments, receivables, prepaid expenses, accounts payable and accrued liabilities and Mexican mining taxes and other payables approximate their fair value because of the short-term nature of these instruments.

The derivative liability was measured at fair value using a level 2 fair value measurement. The Company calculated the fair value of the derivative liability based on the company's share price.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values

OUTLOOK

The Company's current acquisition, exploration and development activities are focused on precious metals in British Columbia and Yukon, with a primary focus on the high grade underground Red Mountain project, which recently entered the BC and Canadian environmental assessment process.

The Company has also commenced a resource update for the Red Mountain project and expects to have completed in the first quarter of calendar year 2016, with a published updated 43-101 PEA to follow in the second quarter of 2016.

The Company continues to advance the Red Mountain project through the environmental assessment process, The Company will continue to evaluate and secure additional financing to fund the ongoing development of the Red Mountain project, including filing of the project application EA report and preparation of feasibility study, While the Company has been successful in the past raising funds, there can be no assurance that the Company will succeed in obtaining additional financing now or in the future.

OUTSTANDING SHARE DATA

As at the date of this report, the Company had an unlimited number of common shares authorized for issuance with 107,301,785 common shares issued and outstanding.

The Company has the following incentive stock options and warrants outstanding at the date of this report:

	Number	Exercise price	Expiry date
Stock Options	37,501	4.20	February 15, 2016
	45,834	2.58	February 1, 2017
	2,850,000	0.24	July 3, 2019
	150,000	0.30	October 10, 2019
	1,230,000	0.11	April 27, 2020
	2,925,000	0.10	October 28, 2020

359,444	0.10	February 1, 2016	

* These warrants are subject to an accelerated expiry in the event that the Company's common shares trade at a closing price greater than \$0.40 per share for a period of 20 consecutive trading days. The Company may accelerate the expiry date of the warrants by giving notice via press release; in such case, the warrants will expire in 30 days from the date of notice.

CRITICAL ACCOUNTING ESTIMATES

IDM's accounting policies are described in Notes 2 and 3 of its audited consolidated financial statements for the year ended October 31, 2015. Management considers the following policies to be the most critical in understanding the judgments that are involved in the preparation of our condensed consolidated interim financial statements and the uncertainties that could impact its results of operations, financial condition and cash flows:

- Use of estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of expenses during the year. Actual results could differ from these estimates.

The consolidated financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the year in which the estimate is revised and future years if the revision affects both current and future years. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The most significant estimates and assumptions relate to the valuation of deferred income tax amounts, impairment testing, the valuation of certain financial liabilities, the valuation of the derivative liability, and the calculation of share-based payments. Share-based payments, as measured with respect to stock options granted, are estimated by reference to the Black-Scholes Pricing Model; a detailed disclosure of management's estimates with respect to the pricing model is found in Note 8 of the consolidated financial statements. The Company has reviewed its exploration and evaluation assets for indications of impairment and has determined that there is no such indication in excess of what has been recorded. The value of deferred tax assets is evaluated based on the probability of realization; the Company has assessed that it is improbable that such assets will be realized and has accordingly not recognized a value for deferred taxes. The valuation of the derivative liability and settlement thereof is discussed in Note 7 and 8 of the audit consolidated financial statements.

The most significant judgments relate to the recoverability of capitalized amounts, recognition of deferred tax assets and liabilities and the determination of the economic viability of a project.

- Exploration and evaluation assets

Exploration and evaluation assets include the costs of acquiring licenses and the fair value (at acquisition date) of exploration and evaluation assets acquired in a business combination. All costs related to the acquisition of mineral properties are capitalized by property as an intangible asset. Costs incurred before the Company has obtained the legal rights to explore an area are recognized in the statement of comprehensive income/(loss). The Company capitalizes costs related to the exploration and development of mineral properties as they are incurred once the legal rights to explore the mineral properties are acquired or obtained.

Exploration and evaluation assets are assessed for impairment if (i) sufficient data exists to determine technical feasibility and commercial viability and (ii) facts and circumstances suggest that the carrying amount exceeds the recoverable amount. Once the technical feasibility and commercial viability of the extraction of mineral resources in an area of interest are demonstrable, exploration and evaluation assets attributable to that area of interest are first tested for impairment and then reclassified to mining property and development assets within property, plant and equipment.

Recoverability of the carrying amount of the exploration and evaluation assets is dependent on successful development and commercial exploitation, or alternatively, sale of the respective areas of interest.

- Share-based payments

The Company grants stock options to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value of stock options is measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to capital stock.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at fair value of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

If and when the stock options are exercised, the applicable amounts of reserves are transferred to share capital.

- Income taxes

Income tax expense comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity. Current tax expense is the expected tax payable on taxable income for the year, using tax rates enacted or substantively enacted at period end, adjusted for amendments to tax payable with regards to previous years.

Deferred tax is recorded using the liability method, providing for temporary differences, between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Temporary differences are not provided for relating to goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable loss, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the date of the statement of financial position.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, it provides a valuation allowance against that excess.

New standards, interpretations and amendments not yet adopted

The following new standards, amendments to standards and interpretations have been issued but are not effective during the year ended October 31, 2015:

- IFRS 9 New financial instruments standard that replaces IAS 39 for classification and measurement of financial assets⁽ⁱ⁾

(i) Effective for annual periods beginning on or after January 1, 2018

The Company anticipates that the application of these standards, amendments and interpretations is not expected to have a material impact on the results and financial position of the Company.

RISKS AND UNCERTAINTIES

Companies in the exploration stage face a variety of risks and investments are highly speculative. While unable to eliminate all of them, the Company aims at managing and reducing such risks as much as possible. The Company faces a variety of risk factors such as project feasibility and practically, risks related to determining the validity of mineral property title claims, commodities prices and environmental laws and regulations. Management monitors its activities and those factors that could impact them in order to manage risk and make timely decisions.

Readers are referred to the Company's Annual Information Form, located on SEDAR at www.sedar.com, for a full list of applicable risk factors.

Evaluation of Disclosure Controls and Procedures

Disclosure Controls and Procedures

The Company has established disclosure controls and procedures to ensure that information disclosed in this MD&A and the related condensed consolidated interim financial statements was properly recorded, processed, summarized and reported to the Company's Board and Audit Committee. Management has used the Committee of Sponsoring Organizations of the Treadway Commission 1992 framework to evaluate the effectiveness of our internal control over financial reporting. Based on the evaluation, the Company's certifying officers concluded that the disclosure controls and procedures were effective to provide a reasonable level of assurance that information required to be disclosed by the Company in its annual filings and other reports that it files or submits under Canadian securities legislation is recorded, processed, summarized and reported within the time period specified and that such information is accumulated and communicated to the Company's management, including the certifying officers, as appropriate to allow for timely decisions regarding requiring disclosure.

Internal controls over Financial Reporting

The Company's certifying officers acknowledge that they are responsible for designing internal controls over financial reporting, ("IFCR") or causing them to be designed under their supervision in order to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS. The Company's management is satisfied that the Company has adequate financial expertise, has conducted appropriate planning and research, has performed appropriate review and has involved the board of directors and audit committee to provide reasonable assurance over the reliability of financial reporting in the transition period.

During the period beginning August 1, 2015 and ending October 31, 2015, management advises that there have been no changes in the Company's internal control over financial reporting that occurred during the most recent interim period, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Limitations of Controls and Procedures

The Company's management, including the Chief Executive Officer and Chief Financial Officer, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

CAUTIONARY NOTE REGARDING FORWARD LOOKING INFORMATION AND STATEMENTS

Some of the statements contained in this document constitute forward-looking information within the meaning of the Securities Act (British Columbia), Securities Act (Ontario), Securities Act (Nova Scotia) and the Securities Act (Alberta). Forward-looking information includes disclosure regarding possible or anticipated events, conditions or results of operations which are based on assumptions about future economic conditions and courses of action, and includes future oriented financial information with respect to prospective results of operations or financial position or cash flow that is presented either as a forecast or a projection. Forward-looking information is often, but not always, identified by the use of words such as seek, anticipate, believe, plan, estimate, expect and intend; statements that an event or result is due on or may, will, should, could, or might occur or be achieved; and other similar expressions.

More specifically, forward-looking information contained here may include, without limitation, statements concerning IDM's plans for its mineral property located in British Columbia, Canada, the timing and amount of estimated future production and mine life, expected future prices of minerals, mineral reserve and mineral resource estimates, estimated capital and operating costs of the project, estimated capital pay-back period, estimated asset retirement obligations, timing of development and permitting time lines; all of which involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements, or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information.

Forward-looking information contained here is based on material factors and assumptions and is subject to a variety of risks and uncertainties, which could cause actual events or results to differ materially from a conclusion, forecast or projection in the forward-looking information. These include, without limitation, material factors and assumptions relating to, and risks and uncertainties associated with, the availability of financing for activities when required and on acceptable terms, the accuracy of the interpretation of drill results and the estimation of mineral resources and reserves, the geology, grade and continuity of mineral deposits, the consistency of future exploration, development or mining results with our expectations, metal price fluctuations, the achievement and maintenance of planned production rates, the accuracy of component costs of capital and operating cost estimates, current and future environmental and regulatory requirements, favourable governmental relations, the availability of permits and the timeliness of the permitting process, the availability of shipping services, the availability of specialized vehicles and similar equipment, costs of remediation and mitigation, maintenance of title to mineral properties, industrial accidents, equipment breakdowns, contractor's costs, remote site transportation costs, materials costs for remediation, labour disputes, the potential for delays in exploration or development activities, timely completion of future mineral reserve or resource estimates, timely completion of scoping or feasibility studies, the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations, currency fluctuations, continuing global demand for base metals, expectations and beliefs of management and other risks and uncertainties as discussed in our MD&A. Although IDM has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from any conclusions, forecasts or projections described in the forward-looking information. Accordingly, readers are advised not to place undue reliance on forward-looking information. Except as required under applicable securities legislation, we undertake no obligation to publicly update or revise forward-looking information, whether as a result of new information, future events or otherwise.
