REVOLUTION RESOURCES CORP.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(Unaudited - Expressed in Canadian Dollars)

JULY 31, 2013

1. NATURE AND CONTINUANCE OF OPERATIONS

Revolution Resources Corp. (the “Company”) is an exploration company incorporated on July 14, 2009 under the laws of the Province of British Columbia, Canada. The Company is listed on the Toronto Stock Exchange (“TSX”).

The Company’s head office, principal address and registered and records office is 1500 – 409 Granville Street, Vancouver, British Columbia, Canada, V6C 1T2.

The Company is in the business of acquiring and exploring economically viable mineral resource deposits on its mineral properties. The recoverability of the amounts shown for mineral properties acquisition costs and related deferred exploration costs are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to sustain operations in the long-term. While the Company has been successful in obtaining its required funding in the past, there is no assurance that such future financing will be available or be available on favourable terms. An inability to raise additional financing may impact the future assessment of the Company as a going concern. These material uncertainties may cast significant doubt about the ability of the Company to continue as a going concern.

The condensed consolidated interim financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company’s ability to receive financial support, necessary financings, or generate profitable operations in the future.

2. BASIS OF PREPARATION**Statement of Compliance**

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standards (“IAS”) 34 ‘Interim Financial Reporting’ (“IAS 34”) using accounting policies consistent with the IFRS issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

Basis of Presentation

These condensed consolidated interim financial statements have been prepared on the basis of accounting policies and methods of computation consistent with those applied in the Company’s October 31, 2012 annual consolidated financial statements.

REVOLUTION RESOURCES CORP.**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

(Unaudited - Expressed in Canadian Dollars)

JULY 31, 2013

2. BASIS OF PREPARATION (cont'd...)**Use of Estimates**

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amount of expenses during the period. Actual results could differ from these estimates.

These consolidated financial statements include estimates and judgements which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The most significant estimates and assumptions relate to the valuation of deferred income tax amounts, impairment testing, the valuation of certain financial liabilities, the valuation of the acquisition of Minera Golondrina S.A de C.V ("Minera Golondrina"), the valuation of the discount rate on the debt and the calculation of share-based payments. Share-based payments, as measured with respect to stock options granted, are estimated by reference to the Black-Scholes Pricing Model; a detailed disclosure of management's estimates with respect to the pricing model is found in Note 7. The Company has reviewed its exploration and evaluation assets for indications of impairment and determined that there is no such indication. The value of deferred tax assets is evaluated based on the probability of realization; the Company has assessed that it is improbable that such assets will be realized and has accordingly not recognized a value for deferred taxes. The valuation of the net assets acquired upon the acquisition of Minera Golondrina is detailed in Note 3. The valuation of the debt is discussed in Note 6.

The most significant judgments relate to the recoverability of capitalized amounts, the functional currency of the Company and its subsidiaries, recognition of deferred tax assets and liabilities and the determination of the economic viability of a project.

New standards not yet adopted

The following new standards, amendments to standards and interpretations have been issued but are not effective during the period ended July 31, 2013:

- IFRS 9 New financial instruments standard that replaces IAS 39 for classification and measurement of financial assets⁽ⁱⁱⁱ⁾
- IFRS 10 New standard to establish principles for the presentation and preparation of consolidated financial statements when an entity controls multiple entities⁽ⁱ⁾
- IFRS 11 New standard to account for the rights and obligations in accordance with a joint agreement⁽ⁱ⁾
- IFRS 12 New standard for the disclosure of interests in other entities not within the scope of IFRS 9/IAS 39⁽ⁱ⁾
- IFRS 13 New standard on the measurement and disclosure of fair value⁽ⁱ⁾
- IAS 28 (Amendment) New standard issued that supersedes IAS 28 (2003) to prescribe the accounting for investments in associates and joint ventures⁽ⁱ⁾
- IAS 32 (Amendment) New standard amends IAS 32 to provide clarifications on the application of the offsetting rules⁽ⁱⁱ⁾.

(i) Effective for annual periods beginning on or after January 1, 2013

(ii) Effective for annual periods beginning on or after January 1, 2014

(iii) Effective for annual periods beginning on or after January 1, 2015

The Company anticipates that the application of these standards, amendments and interpretations will not have a material impact on the results and financial position of the Company.

3. ACQUISITION OF MINERA GOLONDRINA S.A de C.V

During the period ended July 31, 2013 the Company executed a purchase and sale agreement with Lake Shore Gold Corp ("Lake Shore") a Canadian public company, which supersedes the existing option agreement ("Note 5"). Under the terms of the new agreement the Company acquired Lake Shore's subsidiary, Minera Golondrina S.A. de C.V. (Mexico), the sole material asset of which is 100% of the rights, title and interest in the Mexico Properties, subject to certain net smelter royalties ("NSR"). As consideration the Company:

- a) Issued 20,000,000 common shares, subject to certain sale restrictions;
- b) Granted Lake Shore the following royalty interests, subject in each case to certain rights to repurchase a portion of the NSR:
 - i. A 2% NSR on the Universo Property;
 - ii. A 3.5% NSR on the properties comprising the Montana de Oro Project (forming part of the Montana de Oro Property);
 - iii. A 2.5% NSR on the properties comprising the La Bufa Project (forming part of the Montana de Oro Property);
 - iv. A 2% NSR on the properties comprising the Lluvia de Oro Project (forming part of the Montana de Oro Property), and:
- c) Will pay \$5,000,000 in cash or common shares valued at the greater of \$0.20 and a five-day volume-weighted average trading price on or before December 31, 2017 (Note 6).

The acquisition was treated as an asset acquisition. The net assets of Minera Golondrina were valued with reference to the fair market value of the Company's common shares as at the time of issuance, being \$1,800,000, and the fair value of the debt, which at the date of the transaction was \$2,250,000 (Note 6). It was determined that, given the inherent difficulty in providing an accurate valuation over unproven exploration and evaluation assets, the valuation of the net assets of Minera Golondrina was more reliably determined by reference to the market value of the shares issued and the future obligation.

The net assets of Minera Golondrina acquired are as follows:

	Net assets
Cash	\$ 25,083
Receivables	4,016
Exploration and evaluation assets	4,047,036
Accounts payable and accrued liabilities	<u>(26,135)</u>

5. EXPLORATION AND EVALUATION ASSETS**Title to mineral properties**

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain mineral titles as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all its properties and, to the best of its knowledge, title to all of its properties is in good standing.

Mexico Property Portfolio

On December 14, 2011 and as amended July 26, 2012, the Company entered into an option agreement with Lake Shore to acquire up to a 100% interest in the Montana de Oro (comprised of Montana de Oro, Lluvia de Oro and La Bufa Projects) and Universo Properties in Mexico.

Under the amended agreement, in order to acquire an initial 60% in the Mexican Properties, the Company issued 5,713,740 common shares valued at \$2,056,946, must incur \$15,000,000 in expenditures on the Mexican Properties by August 31, 2016, including reimbursing Lake Shore for expenditures incurred with respect to the properties in 2011 for which the Company paid \$3,735,439, and, within 30 days of incurring \$15,000,000 in expenditures, issue to Lake Shore \$1,000,000 in common shares of the Company. Additionally, the Company will issue 7,500,000 common shares to Lake Shore over a four year period (1,000,000 issued at a value of \$195,000).

The Company could acquire a 100% interest in either or both of Montana de Oro and Universo properties by completing 43-101 compliant technical reports and satisfying certain additional terms and payments, as outlined in the Company's October 31, 2012 annual consolidated financial statements.

5. EXPLORATION AND EVALUATION ASSETS (cont'd...)

Mexico Property Portfolio (cont'd...)

During the period ended July 31, 2013 the Company executed a purchase and sale agreement with Lake Shore, which supersedes the previous option agreements. Under the terms of the new agreement the Company acquired 100% of the issued and outstanding shares of Lake Shore's subsidiary, Minera Golondrina, which holds 100% of the rights, title and interest in the Mexico Properties, subject to certain net smelter royalties ("NSR") (Note 3).

The Montana de Oro properties are subject to certain underlying agreements. Underlying payments on the Montana de Oro Property total MXP 1,083,990 in the first year (paid), MXP 700,000 for the next three years and then MXP 1,083,990 every year thereafter.

During fiscal 2012, the Company entered into an option agreement to acquire three additional claims to the La Bufa claims in the Montana de Oro Property. The agreement requires cash payments totalling US\$350,000 (US\$50,000 paid) and issuing 800,000 common shares (300,000 issued at a value of \$48,000) of the Company over a two year period. The vendor retains a 1.5% NSR with respect to these claims.

During the period ended July 31, 2013 the company elected to abandon the Universo Property and consequently wrote off associated capitalized costs of \$4,975,464 as at July 31, 2013.

During the period ended July 31, 2013 the Company entered into an agreement, and subsequently agreed to terminate the agreement, to sell the Concepcion property.

Champion Hills Properties (USA)

During fiscal 2011, the Company acquired, from a non-arm's length private company, a 90% interest in two option and lease agreements by issuing 2,000,000 common shares valued at \$930,000 and paying \$375,312 (US\$375,000). The Company has the right of first refusal on the remaining 10% after incurring US\$1,000,000 in exploration expenditures.

The Company has entered into various additional option and purchase agreements, certain of which have been terminated, to complement the initial land package directly with property owners which entitle the Company to acquire 100% of these properties. As at July 31, 2013, the various option and purchase agreements cover approximately 1,859 acres (October 31, 2012 – 1,859 acres), require annual lease payments ranging from US\$50 to US\$200 per acre over a five year term and US\$1 per foot drilled. The Company has the option to purchase each land package for the greater of 150% of the appraised value or a certain fixed price. Upon commencement of commercial production the properties are subject to a 2% NSR.

During the period and subsequent to period ended July 31, 2013 the Company elected to abandon certain non-core option agreements and consequently wrote-off the associated capitalized costs of \$694,434 as at July 31, 2013

Champion Hills Properties (USA) (cont'd...)

Silver Hill and Silver Valley

During fiscal 2011 the Company entered into two separate letter agreements with a private company, Carolina Mineral Resources Inc. ("CMRI"), on properties known as the Silver Hill mine and the Silver Valley Mine, North Carolina.

Under the terms of the Silver Hill property agreement the Company can earn 100% of CMRI's rights to a mineral lease agreement for consideration of US\$220,000 and exploration expenditures totaling US\$2,500,000 paid in stages to March 2015 and the issuance of 300,000 common shares in stages to March 2014. The Company is also required to issue 500,000 common shares upon completion of a positive, bankable feasibility study and an additional 500,000 common shares upon commencement of commercial production. The property is subject to a 4% NSR. During the year ended October 31, 2011, the Company issued 75,000 common shares valued at \$44,250 and paid \$59,146 (US\$60,000). During the year ended October 31, 2012, the Company issued an additional 75,000 common shares valued at \$25,875, paid \$40,000 and completed the first tranche of exploration expenditures totaling US\$500,000.

Under the terms of the Silver Valley mine agreement the Company can earn 100% of CMRI's rights to a mineral lease agreement for consideration of US\$200,000 and exploration expenditures totaling US\$2,500,000 paid in stages to March 2015 and the issuance of 300,000 common shares in stages to March 2014. The Company is also required to issue 500,000 common shares upon completion of a positive, bankable feasibility study, and an additional 500,000 common shares upon commencement of commercial production. The property is subject to a 4-5% NSR. During the year ended October 31, 2011, the Company issued 75,000 common shares valued at \$44,250 and paid \$39,430 (US\$40,000). During the year ended October 31, 2012, the Company issued an additional 75,000 common shares valued at \$25,875, paid \$40,000 and completed the first tranche of exploration expenditures totaling US\$500,000.

During the period ended July 31, 2013 the Company elected to abandon the Silver Hill and Silver Valley options and wrote-off the capitalized costs of \$1,669,439 as at July 31, 2013.

Hoover Hill

During fiscal 2011 the Company entered into an option and purchase agreement on the Hoover Hill mine property, North Carolina. The Company has a four year option to purchase each land package for the greater of 150% of the appraised value or a certain fixed price. The Company paid \$295,680 (US\$300,000) on signing and issued 100,000 share purchase warrants with a fair value of \$38,775. The option can be extended for an additional year for US\$100,000. Each warrant entitles the holder to one common share at an exercise price of \$0.75 for a period of four years. The Company paid other acquisition costs of \$104,548. The property is subject to a 2% NSR, of which one-half (1%) may be purchased for US\$1,000,000.

Virgilina

During fiscal 2011 the Company entered into an option agreement on the Virgilina copper property, North Carolina. The Company can earn a 100% interest in the property for consideration of US\$600,000 and exploration expenditures totalling US\$1,500,000 paid in stages to March 2015 and the issuance of 400,000 common shares in stages to March 2014. The Company is also required to issue 500,000 common shares upon completion of a positive, bankable feasibility study and an additional 500,000 common shares upon commencement of commercial production. During the year ended October 31, 2011, the Company issued 100,000 common shares valued at \$59,000 and paid \$118,291 (US\$120,000). During the year ended October 31, 2012, the Company issued an additional 100,000 common shares valued at \$34,500, paid \$120,000 and completed the first tranche of exploration expenditures totalling US\$100,000. 6. DEBT

Pursuant to the acquisition of 100% of the issued and outstanding shares of Minera Golondrina (Note 3), the Company is obligated to pay \$5,000,000 in cash or common shares, at the option of the Company, on or before December 31, 2017. If the Company elects to issue the common shares they will be valued at the greater of \$0.20 and a five-day volume-weighted average trading price.

The debt is calculated using the effective interest method. The Company estimates that the debt is subject to an effective interest rate of 18.7%, which is based on comparable borrowing arrangements in the market place.

7. SHARE CAPITAL AND RESERVES**Authorized share capital**

As at July 31, 2013, the authorized share capital of the Company is an unlimited number of common shares without par value. All issued shares, consisting only of common shares, are fully paid.

Private placements

During the period ended July 31, 2013, the Company completed a private placement and issued 7,965,428 units at a price of \$0.07 per unit for gross proceeds of \$557,580. Each unit is comprised of one common share and one-half of one share purchase warrant. Each whole share purchase warrant entitles the holder to acquire one common share of the Company at a price of \$0.125 for a period of 2 years.

During the year ended October 31, 2012, the Company completed a bought deal financing, including the full exercise of the over-allotment option, whereby the Company issued 16,962,500 units at a price of \$0.34 per unit for gross proceeds of \$5,767,250. Each unit is comprised of one common share and one-half of one share purchase warrant. Each whole share purchase warrant entitles the holder to acquire one common share of the Company at a price of \$0.60 for a period of 18 months. The warrants were assigned a residual value of \$848,125.

The Company paid \$403,708, issued 1,187,375 brokers' warrants valued at \$95,127 and paid other share issue costs of \$204,611. Each broker warrant entitles the holder to acquire one common share of the Company at a price of \$0.60 for a period of 18 months following the closing of the offering. The fair value of these broker warrants was estimated using the *Black-Scholes Option Pricing Model* with the following assumptions: risk-free interest rate of 1.26%; dividend yield of 0%; volatility of 100%; and an expected life of 1.5 years.

7. SHARE CAPITAL AND RESERVES (cont'd...)**Share-based payments**

The Company has a stock option plan under which it is authorized to grant options to directors, officers, employees and consultants enabling them to acquire up to 10% of the issued and outstanding common stock of the Company. Under the plan, the exercise price of each option equals the market price of the Company's stock, less applicable discount, as calculated on the date of grant. The options can be granted for a maximum term of 10 years and vest at the discretion of the Board of Directors.

The Company did not grant any stock options during the period ended July 31, 2013. During the period ended July 31, 2012, the Company granted 1,175,000 options with a weighted average fair value of \$0.30 per option to directors, officers and consultants. Total share-based payments for options granted and vested recognized in the statement of loss and comprehensive loss for the period ended July 31, 2013 was \$22,616 (2012 - \$327,312) pursuant to vesting incentive options. This amount was also recorded as reserves on the statement of financial position.

Significant non-cash transactions for the period ended July 31, 2012, include the Company:

- a) Incurring exploration and evaluation asset expenditures of \$412,909 through accounts payable and accrued liabilities.
- b) Issuing 6,293,740 common shares at a value of \$2,191,196 pursuant to the acquisition of mineral properties.
- c) Issuing 1,187,374 brokers' warrants valued at \$95,127 as finders' fees in relation to the brokered private placement.

10. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**Financial Instruments**

Cash and cash equivalents are carried at fair value using a level 1 fair value measurement. The carrying value of short-term investments, receivables, and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments.

The debt is measured at amortized cost. The Company calculates the debt based on the conversion option using the current share price and compares this to the debt calculated using discounted cash flow analysis. When calculating the fair value of the debt using discounted cash flow analysis the Company basis the borrowing rate on similar borrowing arrangements.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

10. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)**Financial risk factors**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with its financial liabilities. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at July 31, 2013, the Company had a cash and cash equivalents and short-term investments balance of \$612,329 to settle current liabilities of \$494,440. The debt recognized in order to complete the acquisition of Minera Golondrina (Note 6) allows the Company to settle, at its option, the obligation in shares; therefore, the debt is not considered to materially increase the liquidity risk of the Company.

There can be no assurance the Company will be able to obtain required financing in the future on acceptable terms. The Company anticipated it will need additional capital in the future to finance on-going exploration of its properties, such capital to be derived from the exercise of outstanding warrants and the completion of other equity financings. The Company has limited financial resources, has no source of operating income and has no assurance that additional funding will be available to it for future exploration and development of its projects, although the Company has been successful in the past in financing its activities through the previously mentioned financing activities. The ability of the Company to arrange additional financing in the future will depend, in part, on the prevailing capital market conditions and exploration success. In recent years, the securities markets have experienced wide fluctuations in price which have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. Any quoted market for the common shares may be subject to market trends generally, notwithstanding any potential success of the Company in creating revenue, cash flows or earnings.

Credit risk

Credit risk is the risk of potential loss to the Company if the counterparty to a financial instrument fails to meet its contractual obligations. The Company's credit risk is primarily attributable to its liquid financial assets including cash and cash equivalents and short-term investments. The Company limits exposure to credit risk on liquid financial assets through maintaining its cash with high-credit quality financial institutions. Receivables consist mainly of HST receivable from the Government of Canada. The Company has been successful in recovering input tax credits and believes credit risk with respect to receivables to be insignificant.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company does not have a practice of trading derivatives.

a) Interest rate risk

The Company's financial assets exposed to interest rate risk consist of cash and equivalents and short-term investments balances. The Company's current policy will be to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As at July 31, 2013, the Company did not have any investments in investment-grade short-term deposit certificates.

10. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd...)**Financial risk factors (cont'd...)***Market risk (cont'd...)*

b) Foreign currency risk

The majority of the Company's business is conducted in Mexico in Canadian dollars and Mexican pesos and in the USA in the US dollar. As such, the Company is exposed to foreign currency risk in fluctuations among the Canadian dollar, the Mexican peso and the US dollar. Fluctuations in the exchange rate among the Canadian dollar, the Mexican peso and the US dollar may have a material adverse effect on the Company's business and financial condition. Fluctuations do not have a significant impact on operating results.

c) Price risk

The mining industry is heavily dependent upon the market price of the metals or minerals being mined. There is no assurance that, even if commercial quantities of mineral resources are discovered, a profitable market will exist for their sale. There can be no assurance that mineral prices will be such that the Company's properties can be mined at a profit. Factors beyond control of the Company may affect the marketability of any minerals discovered. The price of gold has experienced volatile and significant price movements over short periods of time, and is affected by numerous factors beyond the Company's control. The Company closely monitors commodity prices, individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

11. CAPITAL MANAGEMENT

The Company considers capital to be the elements of shareholders' equity. The Company's primary objectives in capital management are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain sufficient funds to finance the exploration and development of its mineral property interests. The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital and is not subject to externally imposed capital requirements.

12. SEGMENTED INFORMATION

The Company's one reportable operating segment is the acquisition and exploration of mineral property concessions. Geographic information is as follows:
